...

This is the product of an arson that set my back stairs on fire approximately 2:30 pm Tuesday June 2, 2026. In the 4900 block of Glenway Ave, Covedale.

Fortunately I was able to get everyone out safely and extinguish the fire mostly I think. The fire department was here very quickly and should be highly regarded for their bravery and compassion for helping us to feel safe!!

I don't recommend trying to put the fire out by yourself by any means. In hindsight it worked out but I put myself at risk and possibly a firefighter for trying to save me. Thank goodness no one was hurt and only the steps were charred.

The reason I'm telling you this is obvious. I want people to realize that the criminals are ruling these streets and by being diligent and refusing to accept their behavior, this was my result. Just because I live in low income doesn't mean I deserve low security.

The female I encountered on May 7, 2026 approximately 6pm was clearly high on something and asked me for a light for her cigarette. I simply told her to keep it moving. She cursed at me and threatened to burn my house down. Almost a month later I believe she tried.

I believe I'm not the only one who feels this behavior is too widely apparent and is unexceptionable for our children and ourselves. I can only imagine the constant struggle our front line people are presented with everyday at work and how hard it is not to bring your job home with you.

I'm tired of being a victim and I believe again that I'm not the only one who feels like this.

I certainly don't have the answers but I do believe I have a basic understanding of what needs to happen in order to take back our streets and our lives from the criminals. I'm sure you have an idea or two as well. I would like to discuss our ideas and come up with a solid plan to take to our Major's, judge's, governor's, senators, Supreme Court, and anyone else who may help make it happen.

I know more than some, the anger I feel on the subject but I want there to be constructive and productive conversations please. Anger only brings anger. Peace brings peace.

Please help me to feel like I'm not a victim but an advocate for people like us who only want prosperity not destruction.

Thank you for listening and I wish you all peace, love, and happiness. What this country should really be about.

But we can't be passive anymore and someone needs to coordinate a movement to let the criminals know.

Thanks again 😊
